#### **FOREWORD**

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

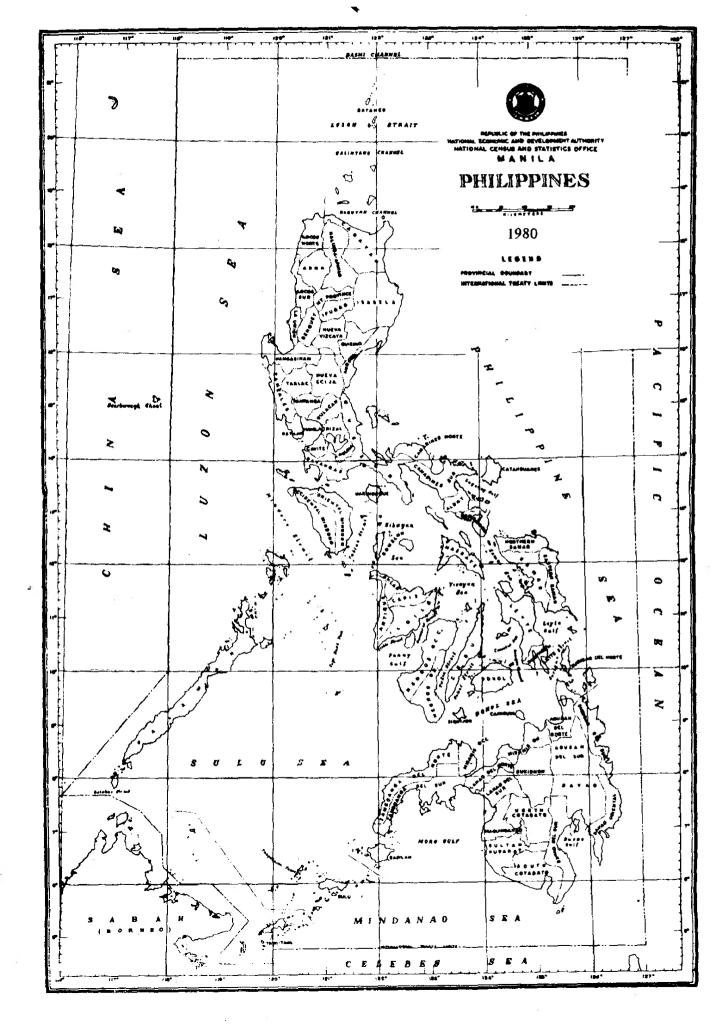

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

TITO A. MIJARES

Manila, Philippines May 1983

## **Explanatory Text**

#### **GENERAL**

#### INTRODUCTION

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

#### **AUTHORITY FOR THE 1980 CENSUS**

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every gensal year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

#### INTER-AGENCY PARTICIPATION

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

#### **CENSUS BOARDS**

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

## **CENSUS ORGANIZATION**

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

## METHOD OF ENUMERATION AND USE OF SAMPLING

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

## PLACE WHERE ENUMERATED

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

## POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

## CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age Sex Marital Status	Type of Building Type of Occupancy Construction Materials of Roof and Outer Walls
Highest Grade Completed Literacy Language/Dialect Spoken in the Household Gainful and Non-Gainful Occupation Major and Minor Industry Migration	Year Built Floor Area of Dwelling Unit Tenure of Owner-Occupant with Respect to the Land Kind of Lighting Facilities Use and Source of Water Supply Type of Toilet Facilities Kind of Cooking Fuel Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

## **DEFINITION OF TERMS AND CONCEPTS**

#### I - POPULATION

#### BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

#### ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

#### URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

- 1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- 2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- 3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
  - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation:
  - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
  - c. At least three of the following:
    - 1) A town hall, church or chapel with religious services at least once a month;
    - 2) A public plaza, park or cemetery;
    - 3) A market place or building where trading activities are carried on at least once a week;
    - 4) A public building like a school, hospital, puericulture and health center or library.
- 4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly nonfarming or fishing.

All areas not falling under any of the above classifications are considered rural.

#### PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

- 1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
- 2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
  - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

- or within one year, if abroad;
- b. students who usually go home to their respective households at least once a week;
- c. persons working elsewhere who usually go home to their respective households at least once a week;
- d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions;
   (2) in mental hospitals;
   (3) in leprosaria or leper colonies; and
   (4) in rehabilitation centers for drug addicts;
- e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
- f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
- g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
- 3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
- 4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
- 5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
- 6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
- 7. Persons found in the household who have no usual place of residence elsewhere;
- 8. Persons found in the household who are not certain of being enumerated elsewhere;
- 9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
- 10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
- 11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
- 12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

## PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

- Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
- 2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
- 3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
- 4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families:
- 5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival;
- 6. Citizens of foreign countries and Filipino, with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a balikbayan who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
- 7. Citizens of foreign countries in refugee camps/vessels; and
- 8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

#### USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

#### HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

### PERSONS NOT LIVING IN HOUSEHOLD

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

#### RESPONDENT

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

## LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

#### **HEAD OF HOUSEHOLD**

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

## RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

- Spouse a woman/man married to and living with the head. This includes legal
  marriages as well as common-law relationships.
- 2. Son/daughter the head's own child, stepchild, or adopted child.

- 3. Son-in-law/daughter-in-law refers to a household member related to the head by marriage to his daughter or son.
- 4. Grandson/granddaughter child of the son or daughter of the head.
- 5. Other relative a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
- 6. Others any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

#### AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

#### **MARITAL STATUS**

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single If never been married.
- b. Married Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated . —If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

#### CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

### LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

#### HIGHEST GRADE COMPLETED

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

#### **USUAL OCCUPATION**

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

#### **INDUSTRY**

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

#### **EVER-MARRIED WOMAN**

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

#### II - HOUSING

#### BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accesoria, condominium) that was vacant;

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

#### The different types of buildings are:

ţ

- 1. Single house a complete structure intended for one household. It includes the so-called "nipa hut" or a small house that is built as a more or less permanent dwelling unit.
- 2. Duplex a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
- 3. Apartment/accesoria/condominium/row house

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

- 4. Improvised (barong-barong) a makeshift or roughly constructed house usually built with salvaged materials.
- 5. Commercial/industrial/agricultural buildings not intended for human habitation but used as dwelling units at the time of the census.
  - Commercial a building used for transacting business or rendering professional services, such as a storage or an office building.
  - Industrial a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.
  - Agricultural any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.
- 6 Other housing unit (natural shelter, boat, etc.)
  - This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.
- 7. Hotel, lodging house, dormitory, etc. This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
- 8. Institutional (hospital/convent/school dormitory/penal institution, etc.) a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
- 9. Other collective living quarters any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

#### **DWELLING UNIT**

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

## CONSTRUCTION MATERIALS OF ROOF

The kinds of materials used are as follows:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Asbestos
- 4. Cogon/nipa
- 5. Makeshift/salvaged materials
- 6. Others (anahaw, etc.)

#### CONSTRUCTION MATERIALS OF OUTER WALLS

The kinds of materials may be any of the following:

- 1. Galvanized iron/aluminum
- 2. Tile/concrete/brick/stone
- 3. Wood/plywood
- 4. Mixed tile/concrete/brick/stone and wood/plywood
- 5. Asbestos
- 6. Bamboo/sawali
- 7. Cogon/nipa
- 8. Makeshift/salvaged materials
- 9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

#### YEAR BUILDING WAS BUILT

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

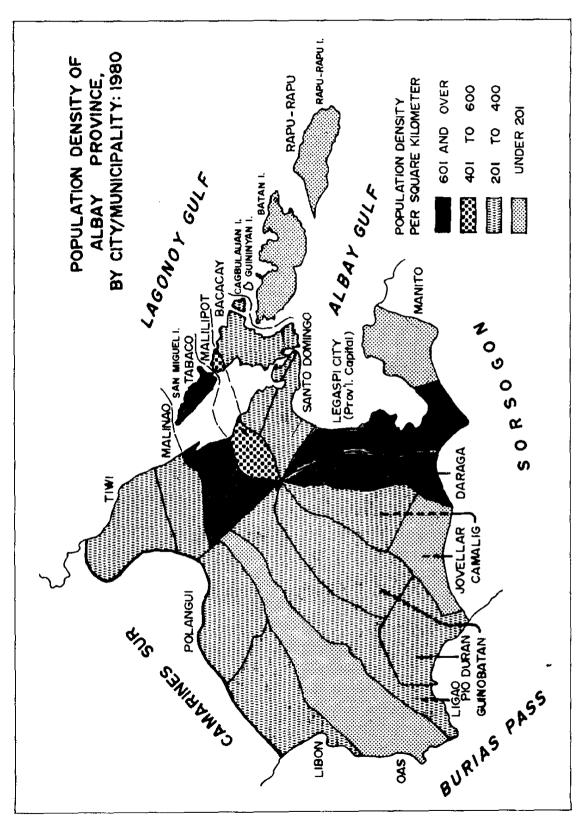

#### NUMBER OF ROOMS IN THE DWELLING UNIT

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

#### FLOOR AREA OF DWELLING UNIT

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

## Albay: A Brief Analysis

Albay lies at the southern portion of Luzon, bordered on the north by Camarines Sur and on the south, by Sorsogon. On the east is the Pacific Ocean; on the southeast, Burias Pass and on the northeast, Lagonoy Gulf and Camarines Sur.

The provincial terrain is generally mountainous, but around Mayon Volcano and Mt. Malinao are scattered areas of fertile plains and valleys. Mayon Volcano, famous the world over for its beautiful almost perfect cone, dominates the landscape. Rising over 7,500 feet above sea level, it serves as a landmark of the entire Bicol region. With an area of 2,552.6 square kilometers, the province constitutes barely 0.85 percent of the total land area of the country.

The province is composed of one city and 17 municipalities. Legaspi City serves as the provincial capital.

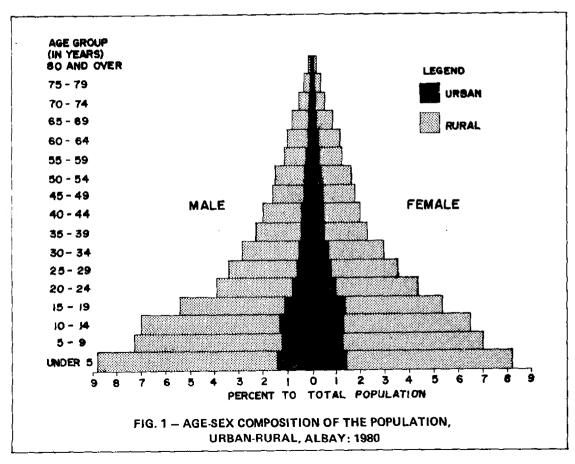

#### **POPULATION**

Albay registered a total population of 809,177 as of May 1, 1980. Following the first quinquennial census on May 1, 1975, its population increased by 80,350, or 11.02 percent over a five-year period, representing an average annual geometric growth rate of 2.11 percent. During the 1960 to 1970 intercensal period, the population grew annually at the rate of 2.73 percent, then fell to 1.58 percent between 1970 and 1975. The population density of the province increased to 317.0, from 264.0 in 1970 to 285.5 inhabitants per square kilometer in 1975.

Rural dwellers number more than four times as many as urban residents — 650,244 compared to 158,933. The proportion of the rural population to the total population has decreased in the last ten years. From 86.30 percent in 1970, it dropped to 85.23 percent in 1975, and declined further to 80.36 percent in 1980. The share of the urban areas to the total population has accordingly been gaining, from 13.70 percent in 1970 to 14.77 percent in 1975, and to 19.64 percent in 1980. This reflects a more rapid rate of growth among urban residents than among rural dwellers especially from 1975 to 1980. Of all the males, 19.01 percent live in urban areas and 80.99 percent, in rural communities. Among the females, 20.29 percent are urban and 79.71 percent, rural residents.

TABLE A — URBAN-RURAL POPULATION BY SEX, ALBAY: 1970, 1975 AND 1980

Area Classification	1980		1975		1970	
and Sex	Number	Percent	Number	Percent	Number	Percent
Total	809,177	100.00	728,827	100.00	6 <u>73,981</u>	100.00
Male Female	409,624 399,553	50.62 49.38	371,535 357,292	50.98 49.02	339,698 334,283	50.40 49.60
Urban	158,933	19.64	107,636	14.77	92,311	13.70
Male Female	77,866 81,067	9.62 10.02	53,085 54,551	7.29 7.48	45,499 46,812	6.75 6.95
Rural	650,244	<u>80.36</u>	621,191	85.23	581,670	86.30
Male Female	331,758 318,486	41.00 39.36	318,450 302,741	43.69 41.54	294,199 287,471	43.65 42.65

Males comprised 409,624 and females, 399,553 of the total population. The sex ratio (number of males per 100 females) decreased to 102.52 from 103.99 in 1975. The sex ratio differed markedly by area: 96.05 for urban and 104.17 for rural areas compared to 97.31 and 105.19, respectively, in 1975.

At each subsequent older age group from the under-five-years old up to the 80 years old and over, the male and female population of the rural areas separately lessen. In effect, as shown in Figure 1, the rural population exhibits a pyramid structure with the male and female children below 5 years forming its base and adults 80 years and over, its apex. Slight irregularities are observed among the urban population which has fewer males and females 5-9 years old than 10-14 years old, and more females 15-19 years of age than 5-9 or 10-14 years.

#### AGE COMPOSITION

Approximately 44.85 percent of the total population are 0-14 years old; 51.41 percent, 15-64 and 3.74 percent, 65 years and over. Due to an increase of 1.14 percentage points in the proportion of persons in the productive age group (15-64 years), the median age rose slightly from 16 years in 1975 to 17 years in 1980.

As shown in the following table, the proportion of the 0-14 age group has continued to fall in the last ten years. After gaining considerably between 1970 and 1975, the proportion of persons in the productive ages rose slightly during the next five years. Although an insignificant decline was observed in the proportion of the elderly (65 years and over) between 1970 and 1975, the proportion increased slightly from 3.17 percent to 3.74 percent in the last two censal years. Between 1975 and 1980, the number of children under 15 years grew by 6.95 percent as compared with 13.54 percent for persons 15-64 years and 30.93 percent for the elderly. The corresponding rates from 1970 to 1975 were 5.36, 10.87, and 7.78 percent, respectively.

TABLE B — AGE COMPOSITION OF THE POPULATION, ALBAY: 1970, 1975 AND 1980

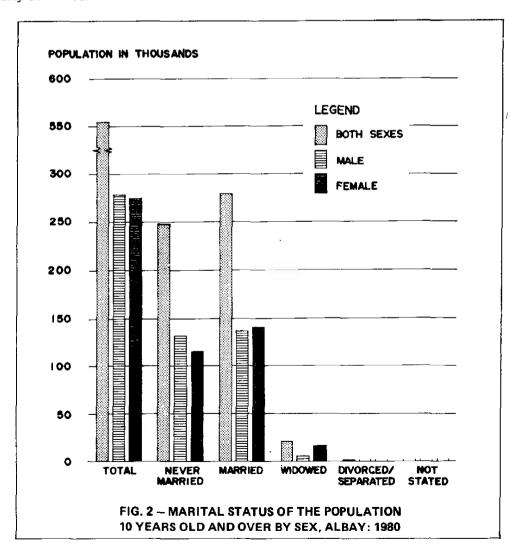

Age Composition	19	80	19	75	19'	70
	Number	Percent	Number	Percent	Number	Percent
Total	809,177	100.00	728,827	100.00	673,981	100.00
0-14 years	362,960	44.85	339,377	46.56	322,121	47.79
15-64 years	415,965	51.41	366,344	50.27	330,422	49.03
65 years and over	30,252	3.74	23,106	3.17	21,438	3.18

Age structures of the urban and rural population differ considerably. Among urban residents, 39.98 percent are 0-14 years; 56.06 percent, 15-64 and 3.96 percent, 65 and over. The corresponding proportions for the rural population are: 46.05, 50.27 and 3.68 percent.

Overall, the dependency ratio stood at 94.53, down by 4.42 since 1975 as a result of a barely-increased proportion of the 15-64 age group. Dependency ratio was lower among urban residents (78.38) than among rural dwellers (98.93), reflecting a much older urban population.

## **MARITAL STATUS**

Of the population 10 years of age and older, 44.87 percent were never married; 50.43 percent, married; 4.13 percent, widowed and 0.45 percent, divorced or separated. As the next table shows, the proportion of never married persons continued to decline for the past 10 years, while the proportion of those married continued to grow. Since 1975, the number of never married persons increased by only 3.56 percent, compared with 19.21 percent for the married. Both categories increased at higher rates in 1970-1975: 9.75 percent for the never married and 12.29 percent for the married. The fastest rates of growth belong to the widowed (35.51%) and the divorced or separated (84.04%), two categories which had previously decreased.

Never married and married males accounted for 47.60 and 49.86 percent of their population. The former decreased by 4.04 percentage points while the latter increased by 3.50 percentage points. As in 1970 and 1975, the females were mostly married. The proportion of females who remained single dropped from 45.69 percent to 42.11 percent. Less likely to be widowed and divorced or separated than females, the males registered only 2.08 percent in the widowed and 0.36 percent in the divorced or separated categories. The corresponding proportions for the females were 6.21 percent and 0.54 percent.

TABLE C - POPULATION 10 YEARS OLD AND OVER BY SEX AND MARITAL STATUS, ALBAY: 1970, 1975 AND 1980

Sex and	19	80	1975		1970	
Marital Status	Number	Percent	Number	Percent	Number	Percent
Both Sexes	<u>555,511</u>	100.00	<u>494,112</u>	100.00	449,086	100.00
Never married	249,238	44.87	240,670	48.71	219,284	48.83
Married	280,145	50.43	235,003	47.56	209,287	46.60

Not stated	- 401	0.14	102	0.04	296	0.13

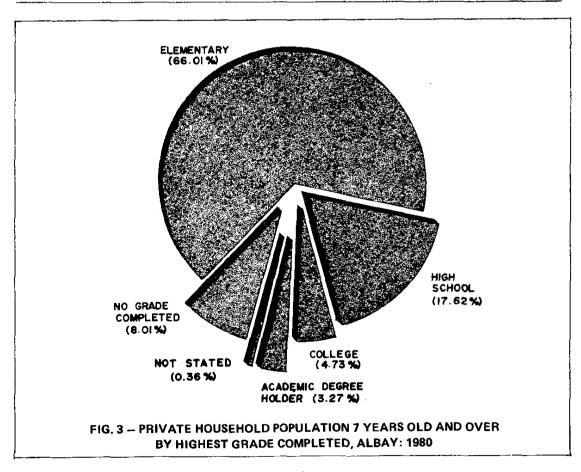

#### HIGHEST GRADE COMPLETED

Educational achievement had risen appreciably during the last five years. Over seventeen percent (17.62%) reached as far as high school compared with 14.10 percent in 1975. Since 1975, the number of persons with high school education increased by 30,721 or 38.72 percent. College undergraduates accounted for 4.73 percent and academic degree holders, 3.27 percent; these proportions hiked, respectively, from 3.29 and 2.22 percent in 1975. The number of college undergraduates accelerated by 59.76 percent; that of academic degree holders, by 63.42 percent. The large number of persons seeking higher levels of education

resulted to a drop in the proportion of those reaching only as far as the elementary grades from 69.51 percent in 1975 to 66.01 percent in 1980. Only 8.01 percent of the private household population 7 years old and over have not completed any grade.

TABLE D -- PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD AND OVER BY HIGHEST GRADE COMPLETED,
ALBAY: 1975 AND 1980

Highest Grade Completed	1	980	1975		
	Number	Percent	Number	Percent	
Total	624,586	100.00	562,707	100.00	
No grade completed	50,003	8.01	55,432	9.85	
Elementary	412,315	66.01	391,134	69.51	
High school	110,062	17.62	79,341	14.10	
College	29,561	4.73	18,503	3.29	
Academic degree holder	20,395	3.27	12,480	2.22	
Not stated	2,250	0.36	5,817	1.03	

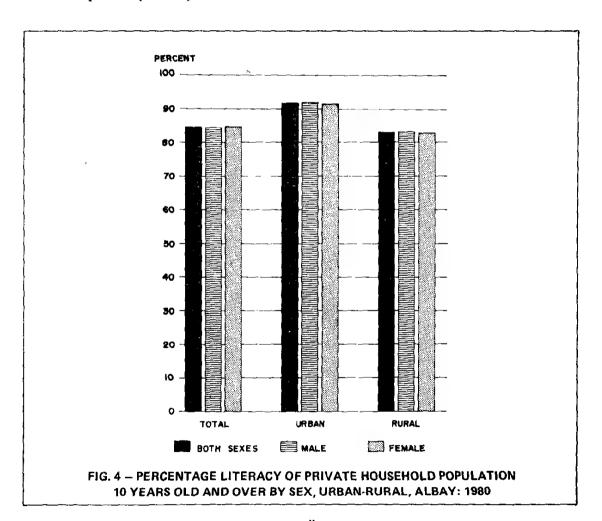

Of the 412,315 persons schooled in the elementary level, 28.93 percent did not go beyond the third grade; 16.44 percent completed the fourth grade; 12.91 percent, the fifth grade and 41.72 percent, the sixth or seventh grade. Of those who continued their schooling up to the secondary level, 67.06 percent finished anywhere from the first to the third year while 32.94 percent graduated from high school. About 17.89 percent of the college undergraduates completed fourth year or higher and 82.11 percent, the lower collegiate years (Table 5).

#### LITERACY

The literacy rate for the private household population 10 years old and over was 84.97 percent. The urban and rural rates differed markedly -91.85 percent and 83.16 percent, respectively.

Overall, male and female literacy rates differed insignificantly, 84.96 percent against 84.99 percent. Urban male literacy rate stood at 91.92 percent compared with 91.78 percent for the urban females. The corresponding figures for their rural counterparts are 83.21 and 83.10 percent (Table 6).

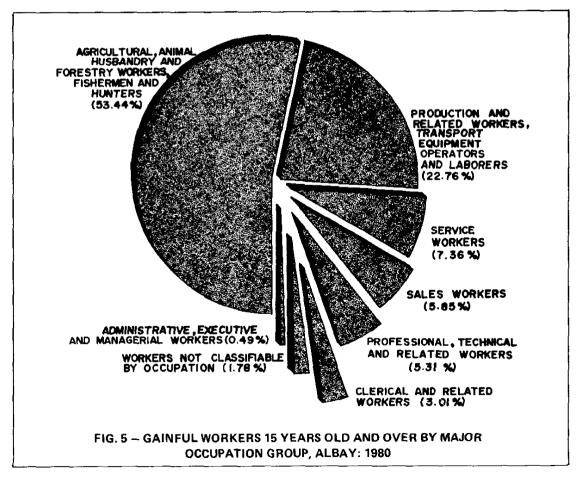

## LANGUAGE OR DIALECT

Bicol, the major dialect of Albay, is spoken by 99.04 percent of all private households in the province. Tagalog is spoken by only 0.72 percent while other dialects like Cebuano, Aklanon and English are spoken by the remaining 0.24 percent (Table 7).

#### **GAINFUL OCCUPATION**

A total of 230,285 persons 15 years old and over have gainful work, up from 203,887 in 1975. More than three-fourths (78,00%) of the gainful workers are males; only 22.00 percent are females.

Agricultural, animal husbandry and forestry workers, fishermen and hunters — by far the single largest occupation group - make up 53.44 percent of all gainful workers. Remaining second among the major occupation groups despite a decline by 2.27 percent, production and related workers, transport equipment operators and laborers comprise 22.76 percent. On the other hand, the proportion of service workers and sales workers increased within five years to 7.36 percent and 5.85 percent, respectively. Professional, technical and related workers hiked to 5.31 percent, and clerical and related workers, to 3.01 percent. At merely 0.49 percent, administrative, executive and managerial workers have dwindled by 24.73 percent of their 1975 level.

The succeeding table reflects the changes in the distribution of the gainful workers 15 years of age and over by major occupation group in the last 5 years:

TABLE E - GAINFUL WORKERS 15 YEARS OLD AND OVER BY MAJOR OCCUPATION GROUP, ALBAY: 1975 AND 1980

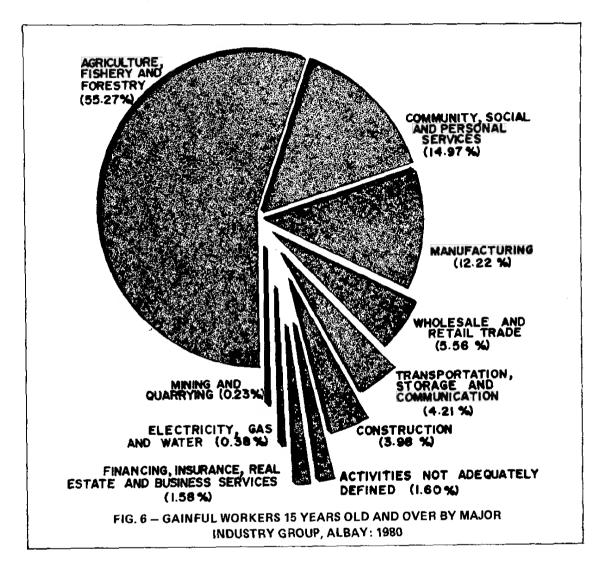

Major	1	980	1	1975		
Occupation Group	Number	Percent	Number	Percent		
Total	230,285	100.00	203,887	100.00		
Professional, technical and related workers	12,233	5.31	8,839	4.34		
Administrative, executive and managerial workers	1,123	0.49	1,492	0.73		
Clerical and related workers	6,930	3.01	4,363	2.14		
Sales workers	13,468	5.85	11,944	5.86		
Service workers	16,957	7.36	11,997	5.88		
Agricultural, animal husband- ry and forestry workers, fishermen and hunters	123,073	53.44	110,002	53.95		
Production and related workers, transport equipment operators and laborers	52,410	22.76	53,630	26.30		
Workers not classifiable by occupation	4,091	1.78	1,620	0.80		

#### **INDUSTRY**

Two major industry groups combined account for over seventy percent of the total gainful employment. Agriculture, fishery and forestry, contributing 55.27 percent of all gainful workers, ranks foremost among the major industry groups in the province. Community, social and personal services, employing 14.97 percent, trails far behind. The remaining 29.76 percent is dispersed among the other major industry groups as follows: manufacturing, 12.22 percent; wholesale and retail trade, 5.56 percent; transportation, storage and communication, 4.21 percent; construction, 3.98 percent; financing, insurance, real estate and business services, 1.58 percent; electricity, gas and water, 0.38 percent; mining and quarrying, 0.23 percent and workers in activities not adequately defined, 1.60 percent (Table 9).

Close to ninety percent of the total workers under agriculture, fishery and forestry are into agricultural crops production (88.41%) and only 8.13 percent, in fishery. Workers engaged in community, social and personal services tend to concentrate in three areas: person-

al and household services (45.28%), education services (23.50%), and public administration and defense (14.30%).

#### **MIGRATION**

A large majority of the private household population 5 years of age and older were residents of the same city or municipality where they had resided on May 1, 1975 (95.88%). Only 1.69 resided in another city or municipality of Albay and 2.22 percent, in another province. Residents of foreign countries made up a negligible 0.21 percent.

Of the private household males 5 years old and over, merely 2.10 percent resided in another province; 1.48 percent, in another city or municipality of Albay and 0.20 percent, in a foreign land. The corresponding proportions for the females of the same age are: 2.34 percent, 1.90 percent and 0.22 percent, respectively. Majority of the males and females who later moved out, whether from another province, from another city or municipality of Albay, or from foreign lands, settled in rural areas (Table 10).

## TYPE OF BUILDING

A great majority (95.01%) of the 140,788 households of Albay are occupying single houses. Others live either in duplex (1.07%) or improvised structures such as barong-barong (2.93%). Few households occupy apartment/accesoria/condominium/row house (0.46%) and commercial/industrial/agricultural buildings (0.46%). A negligible number dwell in other housing units such as natural shelter and boat (0.03%); hotel, lodging house, dormitory, etc. (0.02%); institutional building such as hospitals, convent, school dormitories and the like (0.01%); and other collective living quarters (0.01%).

Most of the households occupying single houses are rural dwellers (81.41%); only 18.59 percent are urban residents. Of those living in duplex structures, 65.87 percent are urban households and 34.13 percent, rural households. As expected, a large majority of the households in apartments/accesorias/row houses and similar structures are in urban areas (63.16%). On the other hand, 87.71 percent of the 4,125 households living in improvised houses are in rural areas (Table 1).

It will be noted from the table below that in 1970, 94.19 percent of the 109,857 households lived in single houses; 0.84 percent in duplex structures; 0.36 percent, in apartment/accesoria/condominium/row house; 3.76 percent, in improvised structures; 0.83 percent, in commercial/industrial/agricultural buildings; and 0.02 percent, in institutional buildings.

TABLE F - NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS
BY TYPE OF BUILDING, ALBAY: 1970 AND 1980

Towns en allow	1	980	1970		
Type of Building	Number	Percent	Number	Percent	
Total	140,788	100.00	109,857	100.00	
Single house	133,756	95.01	103,473	94.19	
Duplex	1,506	1.07	919	0.84	
Apartment/accesoria/condo- minium/row house/etc.	646	0.46	401	0.36	
Improvised (barong-barong)	4,125	2.93	4,130	3.76	
Commercial/industrial/agri- cultural	655	0.46	915	0.83	
Other housing unit: natural shelter, boat, etc.	45	0.03	_		
Hotel, lodging house, dormitory, etc.	30	0.02	_	_	
Institutional (hospital, convent, school dormitory, etc.)	15	0.01	19	0.02	
Other collective living quarters (military camp. etc.)	10	0.01	_	_	

#### TYPE OF OCCUPANCY

Table 1 shows that 89.68 percent of the total households are owners of the dwelling units they occupy. The rest of the households are either tenants/lessees (5.35%), subtenants/sublessees (0.27%), or rent-free occupants (4.70%).

#### CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Dwelling units of about 78.43 percent of the total households have roofs of light materials (cogon/nipa, makeshift/salvaged materials, and other such as anahaw, etc.). The remaining 21.57 percent have their roof constructed of strong materials (galvanized iron/aluminum tile/concrete/brick/stone, and asbestos). Of the urban households, 64.05 percent have their dwelling units roofed with light materials; approximately 35.95 percent are of strong materials. Households in the rural areas also use more light than strong materials, but at a higher percentage compared to their urban counterpart (81.88% light materials and 18.12% strong materials).

As to construction materials of outer walls, the number of households in dwelling units walled with strong materials is higher (58.75%) than those with light materials (41.25%). In the urban and rural areas majority of the households occupy units walled with strong materials, 80.43 percent and 53.56 percent, respectively (Table 2).

#### YEAR BUILT

Approximately 42.17 percent of the total households are occupants of structures built in 1976-1980; 25.24 percent, during 1971-1975; 19.82 percent, 1961-1970; and 8.61 percent, 1951-1960. Merely 2.73 percent live in buildings built during 1942-1950 and 1.43 percent, before World War II (Table 2).

#### FLOOR AREA OF DWELLING UNIT

Most households (68.81%) occupy dwelling units with floor area of less than 30 square meters. About 21.79 percent live in 30-49 square-meter dwelling units; 4.61 percent dwell in units 50-69 square meters and 2.44 percent, 70-99 square meters. Only 2.35 percent have spacious dwelling units from 100 square meters and over (Table 3).

#### TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND

More than half (52.74%) of the 126,265 households that own their dwelling units also own the land where the structure is erected. About 9.81 percent are lessee/sublessee; 12.15 percent, farm lessee/agricultural tenant of landowner; and 5.34 percent, other legal tenure. Almost one-fifth (19.96%) have no tenure such as squatter, etc. (Table 4).

#### SOURCE AND USE OF WATER SUPPLY

Four main sources of water supply for drinking, for kitchen use and for washing clothes are the faucet, community water system, the dug well, spring and tubed/piped deep well. For drinking water, 31.64 percent of the total households in Albay depend on the faucet, community water system; 20.88 percent, on spring; 19.31 percent, tubed/piped deep well; and 18.25 percent, dug well. Less than ten percent drink water from tubed/piped shallow well and only a few households, from lake, river, stream, etc. (0.28%) or rain (0.05%).

For kitchen use and for washing clothes, the faucet, community water system is utilized, respectively, by 27.85 percent and 23.33 percent; dug well, by 22.75 percent and 22.15 percent; spring, 19.94 percent and 18.54 percent; and tubed/piped deep well, 19.03 percent and 14.58 percent. About 9.67 percent rely on the tubed/piped shallow well for kitchen use and 7.40 percent, for washing clothes. While only 0.63 percent use water from lake, river, stream, etc. for kitchen use, 13.89 percent depend on these sources for washing clothes. The least used is rain water with only 0.13 percent and 0.11 percent, respectively (Table 6).

#### KIND OF LIGHTING FACILITIES

More than two-thirds of the private households in Albay still use kerosene (68.94%) for lighting their dwelling units; users of electricity rank a poor second with 28.93 percent. Around 1.89 percent use liquefied petroleum gas (LPG) and 0.06 percent, oil. Only 0.18 percent are reported to be using other kinds. Most urban dwellers (62.56%) use electricity; 35.23 percent use kerosene; 2.13 percent, liquefied petroleum gas; 0.04 percent, oil; and 0.04 percent, other kinds. The pattern in the rural areas is more or less the same as that for the province as a whole, with 77.03 percent using kerosene and 20.87 percent, electricity. About 1.83 percent use LPG; 0.06 percent, oil; and 0.21 percent, other kinds (Table 5).

#### **COOKING FUEL**

Wood or charcoal is still widely used for cooking by Albay residents. Table 8 shows that a high percentage of the total households (86.51%) use wood or charcoal. The remaining 13.49 percent use either kerosene (7.06%), liquefied petroleum gas (4.84%), electricity (0.82%), or other kinds (0.77%). In both urban and rural areas, the predominant use of wood or charcoal is also observed (67.38% of the total urban households and 91.10% of the total rural households). It is also noted that a good number of urban residents cook with liquefied petroleum gas (16.58% against 2.02% for rural dwellers). A higher proportion of the urban households, likewise, cook with kerosene (13.22%) compared to 5.59 percent of the rural households.

#### **TOILET FACILITIES**

The open and closed pit types of toilet facilities are widely used in the province with 26.37 percent and 23.25 percent of the total households using these, respectively. The water-sealed with sewer/septic tank is used by 14.04 percent; the water-sealed with other depository type, by 11.50 percent; and other types such as the pail system, etc. by 2.70 percent. More than one-fifth (22.14%) of the total households lack toilet facilities.

Urban households have better toilet facilities than their rural counterparts. More than one-third (36.13%) of the urban households use water-sealed with sewer/septic tank; 18.33 percent, water-sealed with other depository; 15.87 percent, closed pit (antipolo, etc.); 8.27 percent, open pit; and 2.71 percent, other types. Among the rural households, 8.74 percent use water-sealed with sewer/septic tank; 9.87 percent, water-sealed with other depository; 25.02 percent, closed pit; 30.71 percent, open pit; and 2.70 percent, other types. Households without toilet facilities constitute 18.69 percent in urban areas and 22.96 percent in rural areas (Table 7).

## OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER

Majority or 57.72 percent of the households in Albay have radios; 4.80 percent own television sets while 5.63 percent have refrigerators/freezers. Of the 27,227 urban households, 68.79 percent own radios; 15.75 percent and 17.71 percent own television sets and refrigerators/freezers, respectively. Among the rural households, 55.06 percent have radios; 2.18 percent, television sets; and 2.73 percent, refrigerators/freezers (Table 9).
